

**VAULT**  
**KEYWORD: 'CREATIVITY'**

**TRANSACTION FOR MORTAL BOOK '6342'**

There are many people who desire to understand the purpose of creativity, and therefore we will discuss it in great length in these slides.

Creativity allows for us to develop knowledge of things we do not know, but desire to understand. It creates a link between us and God.

# **PURPOSE OF CREATIVITY**

## **[STUDENT SUBMISSION]**

Doubt allows for us to be humble and recognize that we have information that other people may not agree with. When recognizing the difference between what we know, and what we desire to find out; we find that the friction between ourselves and those who reject an element of our wisdom will manifest itself.

**Cipher:** Why is it important to recognize creativity when evaluating a 'prophet' of the new world?

# UNDERSTANDING DOUBT [STUDENT SUBMISSION]

When a prophet is tasked with a certain job, their doubt causes them to have to use their wisdom in order to overcome the obstacles God has set them out to complete. This wisdom contains elements of doubt and faith because they know that there is a higher power.

**Cipher:** How does faith play a role in a prophet's understanding of their own doubts about their understanding of their wisdom and the change it will bring about?

[Student Submission]

# UNDERSTANDING DOUBTS OF PROPHETS [VAULT TRANSCRIPTION]

The persistence of information requires that one who looks for knowledge will receive it because it is ordained that we shall always study, and study well.

[secret society requirements]

**UNDERSTANDING DOUBTS**  
**[VAULT TRANSCRIPTION]**

Secret societies deal with doubt frequently because they have ideas or beliefs that are not widely known or accepted, and these ideas can cause one who does not know how to think for themselves hardship.

[Scholar's Thought Journal]

**Cipher:** Why is it required that one who studies the works of other people maintain an open mind and use wisdom to find distinctions and unions in information?

# UNDERSTANDING DOUBTS PT.2

## [VAULT TRANSCRIPTION]

Carelessness with one's patience can lead to an exceeding of limits which brings doubt to one's ability to handle situations that are difficult to [ascertain]. There are some people who develop their own internal dialogue that explains what is and is not true, however this self-culture should not be mistaken for anything besides dogma.

# **UNDERSTANDING PATIENCE WITH DOUBT [VAULT TRANSCRIPTION]**

When I study my ability to understand life, it is urgently important for time to persist after me because I keep finding myself in circles of thought I can't get out of. I wish I knew how to perceive my reality in such a way as to understand why I can't think or study completely as the articles require of me.

**STUDY AND PATIENCE**  
**[VAULT TRANSCRIPTION]**

When experimenting, I found myself constantly working with people who do not understand my deeper motives for what I was doing. When I considered this, I realized that understanding who you are working with is just as important as the work itself. My interpretation of the data changes drastically depending on what I am trying to learn, and I find myself uncertain about very little besides my own dogma. How can I tell them that I do not care about the mission, only my own deep education?

**CAREFULNESS**  
**[VAULT TRANSCRIPTION]**

The articulation of the data suggest that we are not the only ones who are working on this topic. It was [apart] of my mind to betray them, and give them everything I knew for some of what they said had more inclination to my dogma then I anticipated. In fact, I partially wished they had hired me for I desired to be at their [table-side].

**CAREFULNESS PROBLEMS  
[VAULT TRANSCRIPTION]**

“You are not doing what you are supposed to be doing.” He said, and he was angry. I knew this. “This is highly secret information, and I require you to understand it exactly the way it was put on the document.”

What was I to do?

**MISUSE OF INFORMATION**  
**[VAULT TRANSCRIPTION]**

The time it took to understand this information was difficult to say [because and furthermore] there was no time to complete it nor any time to understand it. I was not a student anymore, and receiving my first job was not what I expected. How am I supposed to complete this experiment without detailed information on their vision? Their vision determines my focus and that determines my perspective, therefore my job was invalid.

**PERCEPTION INFORMATION**  
**[VAULT TRANSCRIPTION]**

He purposed me to understand his point as much as possible, and I found that if I worked hard, maybe I would have understood; however it was too difficult and I gave up early.

“Do you think you will not be tried?” He had said to me, and I as certain he was joking for I had already been tried much.

However, I did as he asked and did not give up easily for I knew what was expected of me, but my perception was not clear nor was my heart certain as to the time and place of where I would die. This is all I cared for.

**INFORMATION ARTICULATION**  
**[VAULT TRANSCRIPTION]**
