

VAULT

KEYWORD: 'Articulate Patience'

‘Patience of the Titans’

Titans are being referred to under the name angels until their etymology is discovered.

There are people who believe that the [Titans] are not as welcome to helping people as it seems. What makes them different from us as opposed to being more than human? We are all flesh and blood and our spirit cannot reside outside of that. So, why is it that every time we ask them for help, their wisdom outweighs our ability to understand their motives for not helping us graciously?

‘Petition of Saints’

We petition to God the desire to not be ruled by Angels for we have free will, and they don't. Why should we be subjected to their wrath as if they were the most High God? They may consider us to be fiends but we only desire to know ourselves without fear.

Note to self: Restrictive Law

‘Demigods and Titans’

Why is religion so important to our patience with [titans] and [demigods]?

Why do they desire to subject us to their desires?

Why are we the abuse of fiends? Do they control our destiny? Do they circumvent our existence?
